

means for retrieving from a storage location, second information that corresponds to the registration information; and

means for displaying the second information.

2. A method for displaying registered information, comprising:

capturing coded embedded glyph data from a substrate having first image information;

decoding the coded embedded glyph data to develop registration information;

retrieving from a storage location, second information that corresponds to the registration information; and

displaying the second information.

**APPENDIX TO PRELIMINARY AMENDMENT**

**IN THE CLAIMS:**

Please amend claims 1 and 2 as follows:

1. An apparatus for displaying registered information, comprising:

means for capturing coded embedded glyph data from a substrate having first image information;

means for decoding the coded embedded glyph data to develop registration information;

means for retrieving from a storage location, second information that corresponds to the registration information; and

means for displaying the second information [registered with the first information based on the registration information].

2. A method for displaying registered information, comprising:

capturing coded embedded glyph data from a substrate having first image information;

decoding the coded embedded glyph data to develop registration information;

retrieving from a storage location, second information that corresponds to the registration information; and

displaying the second information [registered with the first information based on the registration information].
